How does CarrierStore work?

CarrierStore offers a unique online market exchange for shippers and freight carriers by automating the industry's "spot quote" process. Our **xCHANGE** application connects shippers directly to the major carriers' pricing and linehaul departments, providing real-time spot quotes based on carriers' constantly changing freight capacity.

The best of web-based automation and efficiency!

CarrierStore has brought the best features of web-based applications from the travel and banking industries (Expedia®, Priceline®, Lending Tree®) and applied them to the freight transportation market. Just as airline and travel websites have eliminated the need for travel agents, CarrierStore's **xCHANGE** service can eliminate your need for brokers or Third Party Logistics (3PL) providers, and put a stop to the endless phone calls and e-mails required to obtain timely spot quotes.

No Cost, No Obligation — Just the best prices!

By simply entering your LTL or TL freight specifics into our secure **xCHANGE** website, shippers will automatically receive no-obligation quotes in one hour. Select any bid from the industry's most respected carriers based on price, reputation or other criteria most important to you. CarrierStore is not a 3PL or broker so there is no fee to the shipper - you pay the carrier directly for the all-inclusive price quoted. Taking advantage of internal freight capacity from more than 35 top-tier carriers and eliminating fees means you will consistently see savings of 25-35 percent.
